-! CARALYTIC ACTIVITY: Ubiquitin C-terminal thiolester + H(2)0
-! SUBCELLUIAR LOCATION: Nuclear; nucleolar.
-! SUBCELLUIAR LOCATION: Nuclear; nucleolar.
-! SIMILARITY: Belongs to peptidase family C19.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 127;

"DUB-1, a deubiquitinating enzyme with growth-suppressing activity.";
Proc. Nacl. Acad. Sci. U.S.A. 93:3275-3279(1996).
-! From Norl. Has growth-suppressing activity, induces arrest in G1
-! CATALYTIC ACTIVITY: Ubiquitin C-terminal thiolester + H(2)0 =
ubiquitin + a thiol.
-! INDUCTION: By interleukin-3.

28-FEB-2003 (Rel. 41, Last sequence update)
Probable ubiquitin carboxyl-terminal hydrolase 8 (EC 3.1.2.15)
(Ubiquitin thiolesterase 8) (Ubiquitin-specific processing protease 8)
(Debbjquitinating enzyme 8).
                                                                                                                                                                                409

-!- FUNCTION: Capable of removing ubiquitin from ubiquitinated proteins; also capable of removing NEDD8 from NEDD8 conjugates has no effect on Sentrin-1 conjugates (By similarity).

-!- CATALYTIC ACTIVITY: Ubiquitin C-terminal thiolester + H(2)0 = ubiquitin + a thiol.

-!- SIMILARITY: Belongs to peptidase family C19.

Natl. Acad. Sci. U.S.A. 99;16899-16903 (2002).
-!- FUNCTION: Capable of removing ubiquitin from ubiquitinated proteins; also capable of removing NEDD8 from NEDD8 conjugates but has no effect on Sentrin-1 conjugates.
-!- CATALYTIC ACTIVITY: Ubiquitin C-terminal thiolester + H(2)0 = ubiquitin + a thiol.
-!- SIMILARITY: Belongs to peptidase family C19.
                                                                                                                                                                  MEDLINE=20261541; PubMed=10799498;
